COMMENTS TO AUTHORS

It is a very informative paper on data interpretation. Detail explanation on the possible findings are given. Nevertheless, I find it difficult to relate the explanation to the figures that are given, it will be good if each of the points given for peak interpretation is accompanied by a figure for easy understanding. I cannot locate window P1/P2 in the figure as it has not been labeled. What is the significant of the peak to each of the condition stated by the authors, the observation is made in how many patients, N = ?, all these information will increase the confidence of data interpretation.
