

We are grateful again to the Reviewers because their comments have allowed to further improve this work and helped us to clarify some points which still needed to be better explained. All new changes are marked in yellow throughout the manuscript.

**Reviewer #1:**

Scientific Quality: Grade B (Very good)

Language Quality: Grade B (Minor language polishing)

Conclusion: Accept (General priority)

Specific Comments to Authors: I am satisfied with this revised manuscript and have no other comments. The manuscript can be accepted for publication now.

*A: We would like to thank the Reviewer for the appreciation and the time spent to review our manuscript.*

**Reviewer #2:**

Scientific Quality: Grade B (Very good)

Language Quality: Grade A (Priority publishing)

Conclusion: Minor revision

Specific Comments to Authors: a. Kindly refer to “Lefaucheur JP, Aleman A, Baeken C, Benninger DH, Brunelin J, Di Lazzaro V, Filipović SR, Grefkes C, Hasan A, Hummel FC, Jääskeläinen SK, Langguth B, Leocani L, Londero A, Nardone R, Nguyen JP, Nyffeler T, Oliveira-Maia AJ, Oliviero A, Padberg F, Palm U, Paulus W, Poulet E, Quartarone A, Rachid F, Rektorová I, Rossi S, Sahlsten H, Schecklmann M, Szekely D, Ziemann U. Evidence-based guidelines on the therapeutic use of repetitive transcranial magnetic stimulation (rTMS): An update (2014-2018). Clin Neurophysiol. 2020 Feb;131(2):474-528. doi: 10.1016/j.clinph.2019.11.002. Epub 2020 Jan 1. Erratum in: Clin Neurophysiol. 2020 May;131(5):1168-1169. PMID: 31901449.” This is an important article relevant to the topic and discusses the latest evidences. b. The authors brought the criticism, that Cheng et al., had not provided a PRISMA flow chart. However, Cheng et al., has not claimed their article to be a systematic review for which PRISMA flow chart is required. It is author’s discretion to use it or not in a narrative review. So it should not be a criticism of the article.

*A: We fully agree with the Reviewer and, therefore, we have revised the manuscript accordingly. Namely, the latest evidence-based guidelines on the therapeutic use of rTMS have been included (Lefaucheur JP, et al. Clin Neurophysiol 2020) and the mention on the PRISMA flow chart has been removed, thank you.*
