

**Comment on the article intitled: Clinical expression and mitochondrial DNA study in twin patients with 14484 Leber's hereditary optic neuropathy: A case report**

**Manuscript NO: 71302**

I congratulate you for having produced an excellent article in relation to its originality as well as its scientific quality.

on the conclusion of the abstract and that of the text, I would suggest that you give the same message or at least a similar message

Already add the same message on the conclusion of the abstract and that of the text as following

## CONCLUSION

This is the first report of monozygotic twins homoplasmic for the 14484 point mutation with discordant phenotypic expression of LHON. Additional genetic modifications and epigenetic factors are possibly associated with the occurrence of discordance for LHON during this 11-year follow-up of monozygotic twins.

Please can you replace the term "utilizing" by "using" ?

Already replace the term "utilizing" by using" on page 6,7 and 10.
