

Dear Editors and Reviewers:

Thank you very much for your reviewing of our manuscript entitled "Congenital Lipoid Adrenal Hyperplasia with Graves' disease: A case report " (No.76961) in your busy schedule.

We sincerely appreciate all your valuable comments and suggestions which have brought us great inspiration to improve the quality of our article. Under your suggestion, we have adjusted the timeline and format of the case report according to the author's guidelines. In addition, we re-supplemented all tables and figures to make them look clearer and easier for readers to understand. Our responses to the reviewers' comments are described below in a point-to-point manner.

We hope that our revision will meet all your requirements, and our manuscript will be acceptable for publication in World Journal of Clinical Cases Manuscript. Thank you so much for your help.

Sincerely yours!

YanJun Wang, Ph D

First Endocrinology Department of Shengjing Hospital of China Medical University, Shenyang, Liaoning, PR China

Response to the editor:

We sincerely appreciate all your valuable comments and suggestions which have brought us great inspiration to improve the quality of our article and we sincerely hope that through our careful revision, we can make up for the shortcomings of the article before, meet the publishing format of your magazine, and better guide the clinical treatment.

We provided the original figure documents using PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed by the editor. We added the following copyright information to the bottom right-hand side of the picture in PowerPoint (PPT): Copyright ©The Author(s) 2022. We provided standard three-line tables.

Response to the reviewer 1:

We sincerely appreciate all your valuable comments and suggestions which have brought us great inspiration to improve the quality of our article and we sincerely hope that through our careful revision, we can make up for the shortcomings of the article before, increase the readability of the article, and better guide the clinical treatment.

1. The manuscript can benefit from figures/tables. Particularly gene sequencing, thyroid management can be presented graphically.

Answer 1: We re-supplemented the new table 1 and figure 1 to make them look clearer and easier for readers to understand, including gene sequencing and the timeline of thyroid management.

2. -A timeline of events regarding her condition (appearance of symptoms and how they were managed) will greatly improve the understanding of the manuscript.

Answer 2: We readjust the timeline of events regarding the patient's condition (appearance of symptoms and how they were managed) in line 122-125 to improve the understanding of the manuscript.

Response to the reviewer 2:

We sincerely appreciate all your valuable comments and suggestions which have brought us great inspiration to improve the quality of our article and we sincerely hope that through our careful revision, we can make up for the shortcomings of the article before, increase the readability of the article, and better guide the clinical treatment.

1. -Adjust the format of this case report according to the author's guidelines.

Answer 1: We readjusted the format of this case report according to the author's guidelines.

2. -The case report section is presented in a very messy manner. Medical and family history should go to the beginning. In the last paragraphs of this section, I recommend that the authors not go back in time, because the thread is lost. I agree that the case report section describes the natural history of the disease, from birth to the present, however, check this part.

Answer 2: We readjusted the timeline of the case report section, medical and family history were arranged at the beginning.

3. -Please specify what was the cause of hyperthyroidism in the patient. Graves' disease?

Answer 3: The cause of hyperthyroidism in the patient was Graves' disease. So, we changed hyperthyroidism to Graves' disease.

Response to the reviewer 3:

We sincerely appreciate all your valuable comments and suggestions which have brought us great inspiration to improve the quality of our article and we sincerely hope that through our careful revision, we can make up for the shortcomings of the article before, increase the readability of the article, and better guide the clinical treatment.

1. -Complete the References.

Answer 1: We completed the references according to the author's guidelines.
