SPECIFIC COMMENTS TO AUTHORS

Well written and extensive review regarding role of intestinal flora, bile acids and bile acid receptors in role of development of IBD .This is important as there is increase in the incidence of IBD and development of future medicines for treatment

Reply:thank you

SPECIFIC COMMENTS TO AUTHORS

I think that the manuscript is very well written. I ask the authors to read my suggestions and to include a few important facts in the introductory part of the paper. I wrote in which direction to discuss. After that the paper could be accepted for publication. What are the original findings of this manuscript? What are the new hypotheses that this study proposed? What are the new findings of this study? What are the new concepts that this study proposes? What are the future directions of the topic described in this manuscript?

Reply:thank you, I hope that the reviewer release that it is a review article and not a research article to ask about new findings, and new hypothesis for this narrative review.
