

Dear Editor,

Thank you very much for your hard work for us. According to the constructive comments from the reviewers, we made some modifications to the article and will explain each of them below. We sincerely hope to submit our visual article in your esteemed journal.

Best wishes,

Xian Yang

Responses to Reviewer 1:

Thank you very much for reviewing and commenting on our manuscript. Your cogent report and good suggestions are very helpful for us to revise our work. In addition, we sent our paper to a professional website to polish the structure and grammar (<http://meditorexpert.com>).

Key Words: Please omit 'Case report' keywords from the Key Words list and add more relevant keywords if any.

Answers: We've omitted 'Case report' and added a new keyword.

Case Presentation: In History of present illness, please elaborate how multiple surgeries were performed on same muscles 3 times in such shorter intervals.

Answers: She had been diagnosed with esotropia 17 years earlier and had undergone three previous complicated strabismus surgeries in other hospitals. When the patient visited our hospital, she expressed dissatisfaction with her appearance and strongly requested to improve it through surgery.

Please describe the ophthalmological examination findings under a separate sub heading of 'Ophthalmological examination', not under the sub heading of Physical examination.

Answers: We have changed the structure of the article as requested.

Treatment: Please explain and clarify ‘The intranasal bulbar conjunctiva retropulsion was fixed at 3 mm behind the limbus cornea’.

Answers: We chose to perform Yokoyama's procedure combined with resection of the MR and conjunctiva based on our experience. This procedure can not only return the globe to its normal position, but also reduce the possibility of recurrence due to cicatricial contracture. [1]
