### SPECIFIC COMMENTS TO AUTHORS

As an extramedullary form of proliferating myeloblasts, granulocytic sarcoma (GS) is common in patients with acute myeloid leukemia (AML). GS in the central nervous system is rare, and intraspinal space-occupying lesion caused by GS is even rarer. The authors present concise clinical case with all the relevant diagnostic and therapeutic information. Could be of interest to specialists working in this field.

**Response:**Thank you very much for your professional suggestion and approval.

### SPECIFIC COMMENTS TO AUTHORS

- The manuscript needs throughout grammar revision.- Re-upload figure 1 in (English).- The role of radiology is not clear at the manuscript.- At figure 2 and figure 5: kindly write the used MRI sequences and replace image (A) with better quality ones.

Response: Thank you very much for your professional comments. In combination with the comments of the peer review and through the MedE Editing Service modification, we revised the article to achieve the Grade A. We re-uploaded the clearer pictures, and marked the figure 1 and figure 4 with the used MRI sequences. Thank you again for your professional suggestion.

## SPECIFIC COMMENTS TO AUTHORS

The manuscript is well written and very interesting. Nevertheless, I have a few suggestions for authors which might be helpful for improving the scientific quality of the manuscript. Language improvement is required. Further, I understand that authors are non-native English speakers, so minor language polishing will enrich the content of the manuscript.

Response: Thank you very much for your professional comments. In combination with the comments of the peer review and through the MedE Editing Servic modification,we revised the article to achieve the
