

Reviewer 1

The authors wrote a case report on a patient who was misdiagnosed with AMI who turned out to have Takotsubo Cardiomyopathy. The importance of having a widespread chest pain centre was emphasized by the authors in order provide a prompt and accurate treatment for chest pains. Overall, the manuscript was elaborated, with minor grammatical errors. Perhaps a few comparisons with similar studies/ cases should be added to this manuscript to allow readers to compare this case to other cases.

Thank you very much for your kindly comments, we have corrected the grammatical errors in the paper and added two cases about Takotsubo Cardiomyopathy for comparison in this paper.

Reviewer 2

overall it is an interesting case for the readers and has been attempted good. It needs minor corrections. Grammar needs further improvement. Discussion section has few short comings. Reference not given to a paragraph which is marked in the attached file. Provide reference to that. Also there is some repetition in discussion section , remove that(already marked in original file)

Thank you very much for your kindly comments.

We have corrected the grammatical errors in the paper.

The reference(Pathophysiology of Takotsubo Syndrome: JACC State-of-the-Art Review) has been given in the discussion section.

The repetition in discussion section has been removed.
