

Author Response Letter

Round 1

The authors would like to thank the editor and all reviewers for the constructive reviews and comments of the manuscript.

For Reviewer 1:

The authors would like to thank you for your valuable comments and suggestions, we have revised the manuscript accordingly.

Reviewer's comment:

1. Kindly please rephrase paragraphs which specified in the manuscript with red brackets.

Response:

Thank you for your valuable suggestions, we have revised the manuscript with red brackets accordingly.

2. Please denote all microphotographs for amyloid deposits and other special findings with arrows, circle, etc.

Response:

We would like to thank you for your valuable suggestions. We denote all microphotographs for amyloid deposits in the figures with arrows. Please kindly check.

3. Please provide the list of abbreviations used in the manuscript.

Response:

Lichen amyloidosis	LA
atopic dermatitis.	AD
primary cutaneous amyloidosis mutations	PCA
American Academy of Dermatology	AAD
Food And Drug Administration	FDA

4. If it is possible, please provide the photographs of each patient with equal scale.

Response:

We would like to thank you for your valuable suggestions. We have revised the photographs to 300dpi, but revised the photos to completely equal seems to distort the pictures.

5. Required corrections are enclosed in the text and highlighted with red color.

Response:

We would like to thank you for your valuable suggestions, we have revised our manuscript accordingly in the revision.

6. Modifications that are needed to be accomplished by authors are highlighted with blue color.

Response:

We would like to thank you for your valuable comments and suggestions. We have finished the modifications, please kindly check. Here is a question, we did not get the meaning of "Please mention the best and worst score with their assigned numbers" below the table 1, please be generous with your advice.

7. Please insert the "letters" into their relevant figures

Response:

We would like to thank you for your valuable comments and suggestions. We have inserted the "letters" into figures, please kindly check.

8. Please specify the magnification power of each microphotograph

We would like to thank you for your valuable comments and suggestions. We have specified the magnification power of each microphotograph.

For Reviewer 2:

The authors would like to thank you for your valuable comments and suggestions, we have revised the manuscript accordingly.

Reviewer's comment:

1. First, it would be nice if EASI or BSA was known, before and after treatment, and added in table 1.

Response:

We would like to thank you for your valuable comments and suggestions. We have supplemented the EASI, and added in table 1, please kindly check.

2. Second, and most important, a native speaker/english expert should read and correct the paper.

Response:

Thank you for your valuable suggestions, we have invited a native english company to revise the article, please kindly check. Thanks to www.enago.cn for providing English language editing service.

Round 2

The authors would like to thank the editor and all reviewers for the constructive reviews and comments of the manuscript.

The authors would like to thank you for your valuable comments and suggestions, we have revised the manuscript accordingly.

For Reviewer #1:

Reviewer's comment:

1. Please, fix the last spelling and syntax errors. E.G "treatment BY dupilumab" should be "treatment WITH duoilumab".

Response:

Thank you for your valuable suggestions, sorry about the spelling and syntax errors, we have revised "treatment BY dupilumab" to "treatment WITH dupilumab".

2. In Abstract it is correctly written "Lichen amyloidosis is a chronic, severely pruritic skin disease" and then in Core Tip "LA is a chronic, severe pruritus skin disease".

Response:

Thank you for your valuable suggestions, we have revised "severe " to " severely " in Core Tip.

3. In case one last sentence is "The patient continues to receive dupilumab maintenance therapy by injection of 300 mg dupilumab every 4 wk." The second "dupilumab" should be deleted.

Response:

Thank you for your valuable suggestions, we have deleted the second "dupilumab" .

4. In Discussion "LA treatment is generally directed to relieve pruritus and inflammation, such as....acitretin, is generally directed to relieve pruritus and inflammation. Please delete the last "generally directed to relieve pruritus and inflammation" etc.

Response:

Thank you for your valuable suggestions, we have deleted the last "generally directed to relieve pruritus and inflammation".

5. Pages 5 and 6 are saying the same things, case 1 is presented 2 times. In page 9, case 4 is also presented again, after the text in page 8.

Response:

Thank you for your valuable suggestions, this issue was brought on by a mistake in my submission, which we rectified.

For Reviewer #2:

1. Dear authors, thank you for applying the corrections. Here some recommendations for improvement of your interesting paper are enclosed in the attached files.

Response:

Thank you very much for your valuable suggestions, we have revised the manuscript according to your recommendations.
