

Dear Editor:

Thank you very much for your letter and suggestions on our manuscript. We have revised it as required. As for the problems in the article, our responses are as follows:

1. Response to reviewer #1

Comments: After a minor editing, this manuscript can be accepted.

Response: The manuscript has been revised.

2. Response to reviewer #2

Comments 1: The manuscript requires a minor editing. The background in the abstract is missing, please add it. The results in the abstract are too long, please shorten it.

Response 1: In the summary, I've added background and shortened the results.

Comments 2: Please check the words "After elimination" in Figure 1. Is that redundant?

Response 2: I have modified it as required.

Comments 3: Please edit the tables and references.

Response 3: The forms and references have been modified as required.

3. Response to editorial comments:

Comments 1: Please provide the original figure documents.

Response 1: I have submitted the original figure documents to the editorial office.

Comments 2: Please prepare and arrange the figures using PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed by the editor.

Response 2: Images were produced by statistical software and directly exported, and cannot be edited again. I have added the copyright information to the bottom right of the image.

Comments 3: Authors are required to provide standard three-line tables.

Response 3: I have modified the chart as requested.

We look forward to your reply.

With all my best wishes!
