

Answering reviewer

Thank you for your kind advice for peer-review of this manuscript. These are the updates

Answer to reviewer #1

1. We added the details of treatment after performing the first operation, and explanation of why we delayed this patient's immunosuppressive therapy and contributed to her repeated small intestinal obstruction.
2. We also added explanation for delayed treatment in DISCUSSION part.
3. The sclerosing mesenteritis is rare, there are very limited reports. We tried to select recent reference data but due to this limitation some references are from several years ago.

Answer to reviewer #2

1. In the TREATMENT section, we expanded on the reason why we postponed this patient's immunosuppressive therapy and contributed to her repeated small intestinal obstruction.
2. We added table of laboratory data
3. We cited Danford CJ, Lin SC, Wolf JL. Sclerosing Mesenteritis. Am J Gastroenterol. 2019;114(6):867-873. doi:10.14309/ajg.0000000000000167, in DISCUSSION part
4. We revised CONCLUSION part.
