

#1

SPECIFIC COMMENTS TO AUTHORS

This is an interesting minor review of the research progress of different emerging technologies in plastic surgery. In this study, the authors summarize the application status of the three technologies in plastic surgery, and summarizes prospects for future development. The manuscript is well structured. References are updated. A minor editing is required before acceptance.

#2

SPECIFIC COMMENTS TO AUTHORS

In this study, the authors reviewed the application of different emerging technologies in plastic surgery. This study provided a better understanding of the current status and problems in the application of these technologies in plastic surgery, and to promote their wider application and generate more innovative technologies. The figures should be updated, and the background of the figures should be removed.

Dear Editor

Thank you very much for your valuable suggestion. The manuscript has been edited carefully, and I have updated the image and removed the background.
