

Dear Editors and Reviewers:

Thank you for your letter and for the reviewers comments concerning our manuscript titled Endometriosis of the lung: case report and literature review (Manuscript NO.: 83636, Case Report). Those comments are all valuable and very helpful for revising and improving our paper, as well as the important guiding significance to our researches. We have studied comments carefully and have made correction which we hope meet with approval. Revised portions are marked in red in the paper:

Responses to the reviewer's comments:

Reviewer #1:

1. Response to comment: Computed tomography has been added to the CT;
2. Response to comment: Some important references have been added to the introduction;
3. Response to comment: Added some important information about the patient (such as present history, past history, etc.)
4. Response to comment: The importance of this subject was added to the discussion, and the difficulties of diagnosis were discussed, as well as the impact on quality of life and how to avoid it.

Reviewer #2:

1. Response to comment: The purpose of right lower lung repair is to prevent air leakage;
2. Response to comment: The patient was informed that preoperative bronchial artery embolization and mid-lung resection were the treatment options before surgery, and the patient chose mid-lung resection by herself and signed informed consent for surgery.
