**Re: Submission of a Revised manuscript to the WORLD JOURNAL OF CLINICAL CASES**

Thank you very much for giving us the opportunity to revise our invited review (Manuscript number : 80308)

We would be grateful for the consideration of our revised manuscript “ Incidence and clinical treatment of hypertriglyceridemic acute pancreatitis: Few issues” for publication in the World Journal of Clinical Cases(by Qunying Yang, Qian Zhao, Jian-Wen Hu)

The authors have read and complied with author guidelines, and they all have seen and approved this manuscript for publication. None of the authors had a conflict of interest to disclose concerning this manuscript.

We are grateful to the Editors for their precious contributions and comments. We have revised our manuscript accordingly for grammar, style, structure and we hope that you will now find it suitable for publication in the *World Journal of Clinical Cases*. In case of final acceptance, we agree to make this manuscript open-access.

Below you can find a point-by-point reply to the reviewers.

Thank you for your precious time.

We are looking forward to receiving your decision in due time.

### Reply to Reviewers

1.Reviewer #1 Dear authors,The article represents Letter to Editor with a focus on incidence and clinical treatment of hypertriglyceridemic acute pancreatitis as a response to unknown article. The authors mention reference 1 and then provide comments for another article doi: 10.3748/wjg.v28.i29.3946 (Lin XY, Zeng Y, Zhang ZC, Lin ZH, Chen LC, Ye ZS.?Incidence and clinical characteristics of hypertriglyceridemic acute pancreatitis: A retrospective single-center study.World J Gastroenterol 2022;28(29): 3946-3959 [PMID: 36157550 DOI: 10.3748/wjg.v28.i29.3946]).The article is written with the acceptable English-speaking adduction of the arguments, but some harmonization of the style is required. The article is sufficiently novel and interesting to warrant publication. All the key elements are presented and described clearly. The most discussable options in the article are:1) Would you please kindly correct all your typos and grammar errors throughout the manuscript. The polishing of the style is highly recommended. 2) This is not a peer reviewer report. I would strongly suggest changing your style.3) There is an especially important message in your article but would you please kindly use more "mini-review" format for your ideas. Please underline the problem, including inconsistencies, and properly elaborate on it. I would remind you that you are analyzing retrospective, most probably underpowered, study and the points of statistical power and bias must be mentioned. Please provide the reader with in-depth research analytics and not just general remarks.

Thanks to the reviewer for the appreciation of our paper.We have made modifications according to your recommendations.We have sended the revised manuscript to a professional English language editing company and corrected all typos and grammar errors. The structure of the article were carefully adjusted.

2.Reviewer #2: Authors have made an excellent attempt in understanding the article which has been commented upon. 1. “ Hypertriglyceridemia is a well-established contributory factor ” -It is an etiological factor 2. Especial-spelling mistake in the first line of the manuscript. It should be written as special 3. The authors have wrongly cited the study of interest. That is reference number is wrong. 4. The first point quoted by the authors regarding figure 1 and 2 is valid and it seems to be an error. It can be addressed to the editor and authors and doesn't merit inclusion in the manuscript. Rest of the points in the manuscript are valid and can be discussed.

Thanks to the reviewer for the appreciation of our paper.We have sended the revised manuscript to a professional English language editing company for further language polishing. We have corrected the spelling mistake in the first line of the manuscript and adjusted reference number.
