

Answering Reviewers

Manuscript NO: 85498

Title: Meta-analysis of outcomes from drug-eluting stent implantation in infrapopliteal arteries.

Reviewer #1:

This manuscript is nicely structured and well written. I have no question about this manuscript.

Answers to Reviewer #1:

Thank you very much for your approval of our manuscript.

Reviewer #2:

This is a journal of clinical cases, not journal of review.

Answers to Reviewer #2:

Thank you for your comment. The journal <World Journal of Clinical Cases> clearly indicates on the homepage and other places of its website that it receives meta-analysis articles. In addition, the journal has received and published many articles of this type this year. We understand your initial concerns and look forward to receiving your review and guidance again when submitting other articles in the future.
