World Journal of Clinical Cases

Specific Comments To Authors: I read with great interest the article "Eosinophilic granulomatosis with polyangiitis, asthma as the first symptom, and subsequent Loeffler endocarditis: A case report," by He and colleagues. The article describes a very interesting case of driven hypereosinophilia. I believe it should be emphasized in the text that mutations in the rearrangements of the FIP1L1 and PDGFR-alpha genes were investigated for clonal hypereosinophilic syndromes, especially in the context of the absence of histopathological diagnosis.

Dear Editor:

I wish to re-submit the manuscript titled "Eosinophilic granulomatosis with polyangiitis, asthma as the first symptom, and subsequent Loeffler endocarditis: A case report." The manuscript ID is 85824.

We thank you and the reviewers for your thoughtful suggestions and insights. The manuscript has benefited from these insightful suggestions. I look forward to working with you and the reviewers to move this manuscript closer to publication in the *World Journal of Clinical Cases*.

The manuscript has been rechecked and the necessary changes have been made in accordance with the reviewers' suggestions. The responses to all comments have been prepared and attached herewith.

Thank you for your consideration. I look forward to hearing from you.

Sincerely,
Xing-Yu Xie
