

1. Reply Reviewer #1

In this study, the authors used the CRN position competence as a guide to construct a training program by combining literature search and qualitative interview to provide a reference for training CRN. The study is interesting. Comments: 1. This study is not a review, but a scientometrics study. 2. The manuscript requires a minor editing. Some minor language polishing should be revised. 3. The limit of the study should be listed and discussed. 4. The references list should be edited carefully according to the journal's guideline.

(1) We added 'The limit of the study' in the 'discussion' section to explain the limitations of our research.

(2) We have made overall revisions to the manuscript in accordance with the format required by the journal and edited the language accordingly.

2. Reply Reviewer #2

This is an interesting study of construction of clinical research nurse training program based on position competence. The authors well performed the study, and the results are well discussed. The reviewer recommends to accept this study after a minor editing.

(1) We have made overall revisions to the manuscript in accordance with the format required by the journal and edited the language accordingly.

(2) We have rewritten the background according to the journal format requirements and added aim.

(3) We have increased the resolution of the image to 600 to make it clearer.
