

Answer to reviewer

I would like to express my appreciation for the thorough and positive review of our manuscript. Your comments and feedback are invaluable to us, and we are pleased to see that you found the title, abstract, and key highlights accurately represent our study's focus and significance.

Your recognition of our appropriate interpretation of results and acknowledgment of the study's limitations in the discussion is encouraging. Indeed, larger sample sizes and longer follow-up periods are areas for potential future research, and we appreciate your emphasis on these points.

We are pleased that you found our figures, tables, and diagrams to be of good quality, along with suitable captions. We have taken care to present our data clearly and effectively.

Finally, your positive assessment of the manuscript's organization and presentation is very encouraging. We have worked diligently to ensure that our research is well-structured and easily understandable.

Once again, thank you for your thoughtful review, and we hope that our study can contribute to the body of knowledge in the field of decubitus ulcer reconstruction. If you have any further suggestions or questions, please feel free to let us know.
