Specific Comments to Authors: Dear authors the presented article is interesting. It is necessary to make a comparison with LMWH which can be monitored and dose adjusted. Best regards

Author Response: Thank you very much for your review and high evaluation. Your

comments were very important and meaningful. Firstly, we do not routinely use LMWH to prevent DVT, it may increase the risk of bleeding after brain tumor surgery; secondly, the present study was a single-center randomized controlled trial, the study protocol and Outcome evaluation were prepared in advance. However, we will design a new single-center randomized controlled trial to study LMWH, and compare the effective and safety of LMWH and UTI. Thank you very much again!

Additionally, we had sent our revised manuscript to a professional English language editing company to polish the manuscript further. Thank you very much for your review and comments.

Thank you very much for your comments again.
