

Name of Journal: World Journal of Clinical Cases

Manuscript NO: 80889

Manuscript Type: REVIEW

Point-by-Point reply

Reviewer #1:

Conclusion: Minor revision

Specific Comments to Authors: Dear sir, i read this manuscript with interest and i recommend to accept after minor language correction

Answer: We thank the reviewer for reading our manuscript carefully. We revised and reworded the manuscript accordingly.

Reviewer #2:

Conclusion: Minor revision

Specific Comments to Authors: Although the research question is important, some points have to be reviewed regarding this manuscript. Specific comments: 1. Concerning language quality (style, grammar, and spelling), the manuscript should be submitted for minor language polishing. The manuscript must strictly follow the authors' guidelines.

Answer: We are grateful for reviewer's comment. The manuscript was revised carefully and checked for grammar and spelling.

Company editor-in-chief:

I recommend the manuscript to be published in the World Journal of Clinical Cases. Before final acceptance, when revising the manuscript, the author must supplement and improve the highlights of the latest cutting-edge research results, thereby further improving the content of the manuscript. To this end, authors are advised to apply a new tool, the Reference Citation Analysis (RCA). RCA is an artificial intelligence technology-based open multidisciplinary citation analysis database. In it, upon obtaining search results from the keywords entered by the author, "Impact Index Per Article" under "Ranked by" should be selected to find the latest highlight articles, which can then be used to further improve an article under preparation/peer-review/revision

Answer: We thank the editor for reading and considering our manuscript. According to his suggestion, novel and highly important clinical as well as translational studies were added to the sections „Pathophysiology“ and „Diagnosis“.
