

Dear Editors and Reviewers:

Thanks for your letter and for the reviewers' comments concerning our manuscript entitled "Eccrine porocarcinoma in the tempus of an elderly woman: A case report" (ID:90862). Those comments are valuable for revising and improving our paper with important guiding significance. We have made correction according to the comments. Revised portions are marked in red in the paper. The responds to the reviewers' comments are as follows:

**Reviewer 1:**

**Comment 1:** Introduction: "It would be helpful to include statistical data or reference to support statements about high misdiagnosis rate of EPC if available."

**Response:** We are so grateful for your kind advice. Considering the reviewer's suggestion, we have increased the reference [1-2] to assist the rate of misdiagnosis.

**Comment 2:** Discussion: "More details about the specific immunohistochemical markers and their roles in differentiating EPC from other skin tumors would enhance the discussion."

**Response:** Thanks so much for your kind suggestion. We added the markers to identify EPC and other skin tumors[16-17].

**Comment 3:** Discussion: "The discussion on diagnostic protocols could be strengthened by suggested potential improvements or emerging technologies in EPC diagnosis."

**Response:** We are so grateful for your kind advice. Considering the reviewer's suggestion, we reviewed additional literature to refine the diagnostic methods[14].

**Comment 4:** Conclusion: "A brief mention of the limitations of the study or suggestions for future research could enhance the conclusion."

**Response:** Thanks so much for your kind suggestion. We have added the contents for the limitation of our research.

**Reviewer 2:**

**Comment 1:** Discussion: "The discussion should stress about what is new in the field of the case report."

**Response:** Special thanks for your kind suggestion. We have highlighted the location and growth of this case what different from others.

**Comment 2:** Language: "Language needs few polishing: example: Abstact: However, surgical management alone may be inadequate if there is metastasis present. Introduction: EPC is a rarely skin tumor originates..."

**Response:** Special thanks for pointing out our mistakes., we have revised these sentences, we changed “surgical management alone may be inadequate if there is metastasis present” to “surgical management alone may be inadequate if the tumor has metastasized” and changed “EPC is a rarely skin tumor originates...” to “EPC is a rare skin tumor which originates...”.
