Reviewers' comments:

Reviewer #1: The title is informative and relevant. The references are relevant and recent. The cited sources are referenced correctly. Appropriate and key studies are included. The research question is clearly outlined. The case is well-described, the used methods methods for diagnosing and therapy are valid and reliable. The patient data is presented in an appropriate way. The illustrative materials are relevant and clearly presented. Data is discussed from different angles and placed into context without being overinterpreted. The conclusions are supported by references and own results. This paper added to what is already in the topic. The article is consistent within itself. Specific comments on weaknesses of the article and what could be improved:

Major points - none

Minor points

1. The introduction should be- enlarged.

Reply: Thanks for the helpful comments. The introduction has been enlarged.

2. The authors should make recommendations for the clinical practice.

Reply: We appreciate for the valuable comments. The recommendations for the clinical practice have been added in the conclusion section.
