

April 28, 2014

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 9564-edited.doc).

**Title:** Prucalopride-associated acute tubular necrosis

**Author:** Vithika Sivabalasundaram, Flavio Habal, David Cherney

**Name of Journal:** *World Journal of Clinical Cases*

**ESPS Manuscript NO:** 9564

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

(1) This is an important case report in regard to clinical use of prucalopride. My only concern is that serum creatinine is used for measurement of renal function, which is often underestimated in elderly patients. Why not used GFR? The probability of pre-existing kidney disease in this patient should be discussed in the paper.

3 References and typesetting were corrected

Thank you again for publishing our manuscript in the *World Journal of Clinical Cases*.

Sincerely yours,
