Referee 1:

This guideline article is well written and has a high scientific value to be published in the WJCC. Before that, the authors should revise some weakpoints.

- 1) Title: "standardization" is more appropriate than "integration". We changed title accordingly.
- 2) Tables are rather puzzling. Please contrive their constructions to understand easily. We changed tables in order to make them more clear.
- 3) The letters of figure is rather small. We changed the letters in figure.
