ESPS Manuscript NO: 12925

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

(1) This is an interesting case report. But the conclusion should be re-written to support the results. Compare a case report of gingival unit and FGG cannot make a conclusion “one is better than the other”, especially the pattern/size of root exposure, size of wound bed and the thickness of tissue are different. The author just can say gingival unit method can be successfully used for treatment of ...

The conclusion is rephrased and re-written;

In conclusion, the GU technique performed on Case I can be successfully used for the treatment of Miller III recession.

(2) Radiographic pictures of these affected teeth should be shown.

Case I patient's radiographic picture is

Case II patient's radiographic picture is

3 References and typesetting were corrected

Thank you again for publishing our manuscript in the *World Journal of Clinical Cases*.
