

Thank you for the review of the article. I corrected it. Thank you in advance for your help.

Reviewer 3529651

I want to investigate the prospective study with large number of patients in future.

1. I corrected the sentence
- 2, 3. We did not use the NSAID in all cases. I added this sentence in materials and methods. Many trials are carried out for the prevention of post-ERCP pancreatitis. The balance of the article did not list it at this time that became bad when I put only the thing of the NSAID in discussion.
