

Responses to Reviewer Comments:

The authors deeply appreciate your critical, helpful and constructive comments. All your suggestions have been adopted, and the corrections, modifications and revisions have been conducted in the revised manuscript.

1. Update references, 2016-2018.

Answer: Thank you very much for your suggestion. We have supplemented the new reference "Saldaña NG, Mendoza FJO, Larrauri FR, Trujillo DMG, Montoya EV, De La Garza EA, Olguín HJ. Bronchopulmonary infection by *Lophomonas blattarum* in a pediatric patient after hematopoietic progenitor cell transplantation: first report in Mexico. *J Thorac Dis* 2017; 9:E899-E902 [PMID: 29268431 DOI: 10.2137/jtd.2017.09.19]"

In addition, some modifications have been made according to the guidelines of the journal.

1. The title has been revised, and a running title has been added, please see the revised manuscript.
2. In the abstract section, a structured abstract is reorganized according to the requirements of the journal, please see the new edition.
3. Two key words are added according to the guidelines.
4. After reading more articles, we revised the core tip and provided the audio core tips in the attached files.
5. In the introduction section, some redundant contents are summarized briefly and integrated into the second paragraph. The introduction mainly described the types of infection and possible pathogenic pathways of superflagellates, and the problem exist in the reported cases.
6. Some minor mistakes such as international standard unit are corrected in the CASE PRESENTATION. Furthermore, the subjective discussion is deleted, and the objective description of the specimen is retained.
7. In the discussion part, some repetitive statements have been deleted, and the deficiency of this case is referred, meanwhile, EXPERIENCES AND LESSONS are added also.
