They clearly describe the case and discussed with appropriate references, adequate images and interesting discussion, highlighting the key points concisely clearly and logically. - 1- Please revise the manuscript according to the review report and my comments. And answer all of the reviewers' comments carefully. As the 02885976 suggested, it would be nice if the authors include a table containing the principal findings for each image study. **Please add the table.**

We have already added the table suggested at the end of the manuscript on line 1-5 of page 23, which is quoted as “Principle findings for each image study were summarized (Table 1).” in the manuscript on line 17-18 of page 12. Thank you.

We modified the name of the grant from “Beijing Municipal Administration of Hospitals’ ‘Peaking Climbing’ Talents Training Program” to “Beijing Municipal Administration of Hospitals’ Ascent Plan” according to the application form on line 15-16 of page 2. We are so sorry for the fault. We have already uploaded the approved grant application form as requested in the files individually.
