

August 8, 2019

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name : 50041-review.doc) .

Title: Dermatofibrosarcoma metastases to the pancreas: A case report

Author: Huai-Jie Cai, Jian-Hua Fang, Nan Cao, Wei Wang, Fan-Lei Kong, Xi-Xi Sun, Bin Huang

Name of Journal: World Journal of Clinical Cases

ESPS Manuscript NO :50041

The manuscript has been improved according to the suggestions of reviews:

1. Format has been updated.
2. The paper has been edited by International Science Editing again.
3. Revision has been made according to the suggestions of the reviewers

The first reviewer

(1) Didn't the authors undergo EUS-FNA to make preoperative pathological diagnosis before operation?

Firstly, the location of the mass is relatively deep, and the puncture may lead to the complications of bleeding, implantation metastasis etc.

Secondly, the patient had a history of fibrosarcoma, and CT and MRI suggested the possibility of multiple metastasis of pancreatic fibrosarcoma.

Thirdly, the patient suffered abdominal pain and nausea and other

clinical symptoms, so he voluntarily asked for resection and intraoperative frozen section.

(2) Please discuss about differential diagnosis.

The differential diagnosis has been discussed in the manuscript.

Thank you again for publishing our manuscript in World Journal of Clinical Cases.

Sincerely yours,

Bin Huang,
