

Answer to Reviewer

Q1- how is the follow up of patient?

Reply: During the follow-up of the past six years, the patient was in good condition.

Q2-intracorporeal abscess may trigger coinfections"(<https://doi.org/10.1111/tbj.13174>) and (doi: 10.5152/ejbh.2018.4132) I suggest both of these uptodate studies for the references.

Reply: I read the two papers ([The Breast Journal, 2019; 25: 154](#). [Eur J Breast Health, 2018; 14: 134-135](#).) mentioned above, and I am sorry to find that they are not related to the content of my manuscript, so I did not quote them.

Answer to Editor

Q1- about informed consent statement

Reply: I have re-upload the informed consent statement with our hospital seal.

Q2- Please check and confirm that there are no repeated references!

Reply: I have checked and confirmed that there were no repeated references.

Q3- Please provide the decomposable figure of all the figures, whose parts are all movable and editable, organize them into a PowerPoint file, and submit as "Manuscript No. - image files.ppt" on the system. Make sure that the layers in the PPT file are fully editable. For figures, use distinct colors with comparable visibility and consider colorblind individuals by avoiding the use of red and green for contrast.

Reply: I have put all the pictures in PPT files.

Q4- Please add magnification and scale bar to the Figure.

Reply: I have added the scale bar to the Figures.
