

Dear Author: Regarding your work entitled: Epstein-Barr Virus-Positive Posttransplant Lymphoproliferative Disorder Presenting as Hematochezia and Enterobrosis in Renal Transplant Recipients in China: Two Case Reports and Literature Review The cases are interesting and carry a good message.

Only minor points: To review the language and to correct some typing errors like: diagnotic to diagnostic and to add a full description to your figures

Answering:

Thank you very much for your review of our manuscript. We've done a careful review of the language again. In addition, the Figure notes have been revised and enriched.
