

## **Answer to reviewers:54456**

### **Answering to reviewer 1:**

Thank you for your kind reminding. 1.The title of the manuscript has been shortened to "Transjugular intrahepatic portosystemic shunt and splenectomy are more effective than endoscopic therapy for recurrent variceal bleeding in patients with idiopathic noncirrhotic portal hypertension". Hope this title will meet the requirements. 2. The tables has been revised. All the abbreviations were explained and P values were introduced. 3. The language was reedited.

### **Answering to reviewer 2:**

Thank you for your advices. 1.The title of the manuscript has been shortened to "Transjugular intrahepatic portosystemic shunt and splenectomy are more effective than endoscopic therapy for recurrent variceal bleeding in patients with idiopathic noncirrhotic portal hypertension". Hope this title will meet the requirements. 2. The language was reedited.
