CHINA-JAPAN UNION HOSPITAL OF JILIN UNIVERSITY

Apr 28th, 2020,

Lian-Sheng Ma, Company Editor-in-Chief

Jin-Lei Wang, Science Editor,

World Journal of Clinical Cases.

Dear Dr. Ma and Dr. Wang:

Thank you for considering our paper titled “Optical Coherence Tomography Guided Avoidance of Stenting in a Young Female Acute Myocardial Infarction Patient with Antiphospholipid Syndrome: A Case Report (54774)” for publication in *World Journal of Clinical Cases*.

We have improved the content in accordance with the reviewer’s and the editors’ comments and have attached a revised version of our manuscript. Please find our point-by-point responses to the comments below. The revised text is highlighted in the revised manuscript. Also we would like to note that we have made one more change other than the comments:

As required by our hospital, authors Beibei Du, Ya-liang Tong, Kun Liu, Pei-pei Li, Xiang-dong Li, Ping Yang, and Ying Wang need to change their affiliations from “China-Japan Union Hospital of Jilin University” to “The Third Hospital of Jilin University”. (The Same hospital with two names) (Page 1, line 13; Page 2, line 22-23)

We confirm that all of the authors have approved the changes to the revised manuscript. We would be grateful if the revised manuscript could be further considered for publication in *World Journal of Clinical Cases*, and we look forward to hearing from you soon.

Yours sincerely,

Ying Wang, MD,

Department of Cardiology, The Third Hospital of Jilin University,

Xiantai Street NO.126, Changchun, China

Response to Reviewer 1

1. Comments: Not every significant coronary stenosis does need a stent: Nice case.

Res: Thank you for the valuable comment. We agree wholeheartedly that stenting in APS related AMI should be taken cautiously.

Response to Science Editor

1. Comments: The title is too long, and it should be no more than 12 words;

Res: Thank you. We have abbreviated the title into "OCT Guided Stenting Avoidance in an Antiphospholipid Syndrome Patient: A Case Report" (Page 1, line 5-6)

2. Comments: The authors did not provide the approved grant application form(s). Please upload the approved grant application form(s) or funding agency copy of any approval document(s);

Res: Thank you. We have uploaded separately.

3. Comments: The authors did not provide original pictures. Please provide the original figure documents. Please prepare and arrange the figures using PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed by the editor;

Res: Thank you. We have uploaded a PPT version of the figures with all separate components.

4. Comments: PMID and DOI numbers are missing in the reference list. Please provide the PubMed numbers and DOI citation numbers to the reference list and list all authors of the references. Please revise throughout;

Res: Thank you. We have revised accordingly. (please note there is no DOI for Ref No. 10, more information at <https://www.ncbi.nlm.nih.gov/pubmed/?term=Antiphospholipid+antibody+syndrome+and+acute+stent+thrombosis.+Reviews+in+cardiovascular+medicine>)

Response to *Company Editor-in-Chief*

1. Comments: The title of the manuscript is too long and must be shortened to meet the requirement of the journal (Title: The title should be no more than 12 words).

Res: Thank you. We have abbreviated the title into “OCT Guided Stenting Avoidance in an Antiphospholipid Syndrome patient: A Case Report” (Page 1, line 5-6).
