Dear reviewer,

We are grateful for the great evaluation of our manuscript and for your valuable comments. You recommended the inclusion of more details about findings in clinical examination. However, the clinical examination of the patients was not performed in this study, since only the fact of being pregnant women in prenatal care with gestational age between 32 and 40 weeks was enough for the inclusion of the patients. Therefore, no health disorder was investigated, and, apparently, all the included patients were healthy.

Best regards,

Fabício Freire de Melo

Professor, PhD
