Editor-in-Chief

*World Journal of Clinical Cases*

Re: Resubmission of manuscript of 56035

Dear Editor

First of all, we want to express our great appreciation for your consideration of our manuscript "TFE3-expressing malignant perivascular epithelioid cell tumor of the mesentery: case report" (ID 56035) for publication in *World Journal of Clinical Cases*. The reviewer comments were helpful in guiding this revision, and encouraging for highlighting the importance and clinical significance of this case.

Per the reviewer and editor comments, we have carefully revised the manuscript, ensuring that there are no remaining language-related issues. We have also adjusted the formatting of the figure legends to be uniform.

Unfortunately, the resources for performing TFE3 fluorescence in-situ hybridization are not available at our institute, and the TFE3 probe is not available due to COVID-19 in current situation.

We hope that our response and revision are satisfactory, and that the manuscript is now deemed suitable for publication in your journal. Thank you for your continued consideration. I look forward to hearing from you.

Sincerely

Nah Ihm Kim, MD, PhD
