

Dear Editors and Reviewers:

Many thanks for your reviewing comments on our manuscript entitled “**Analysis of risk factors for adverse cardiac events in adults with fulminant myocarditis during hospitalization**”. We read the comments carefully and made necessary corrections based on your comments as below.

Reviewer #1:

1. There are a minor language polishing, which require a minor editing.

Response: Yes, we let our language company check carefully and made some more polishing. I hope this time it can satisfy the requirements of your journal.

2. The tables are good, however, the table 5 should be deleted, and move the data into the main text. Too small for a table.

Response: Thanks for your comments on the tables. We have removed table 5 and describe the related content in main text.

3. References are update, but please revise the format according to the journal's style.

Response: We have some difficulties in understanding the style and provide the PMID and DOI numbers. Can you help us or provide us more

details?

Reviewer #2:

1. I suggest the authors include and discuss another article published in 2018 by Ganatra S, Neilan TG: Immune Checkpoint Inhibitor-Associated Myocarditis, *Oncologist*. 2018 Aug;23(8):879-886. doi: 10.1634/theoncologist.2018-0130. PMID: 29802219.

Response: Thank you. I have added the above related reference as reference No. 22. Please check if it is appropriate.

2. And a minor language editing is required.

Response: We have done as previous comment from reviewer. Our language company have checked through and provided some update.

Thanks again and we appreciate so much for Editors and Reviewers' warm work earnestly. If you still need us to provide more revision, please let us know.

Best regards,
