

We appreciate the reviewers' interest in our work, the detailed evaluation, and the helpful suggestions and criticisms that were provided. Here are the specific responses to the concerns raised by the reviewers:

**Reviewer #1**

*I think the manuscript is well written and addresses novel approaches. Some of the grammar makes it difficult to follow, esppecially in regards to gene upregulation and down regulation. However, it still reads well.*

We very much appreciate the valuable comment from this reviewer. The data underlying this article will be shared on reasonable request to the corresponding author.

**Reviewer #2:**

*It is an interesting case who suffered from UC and ITP. The authors successfully treated the disorder with tofacitinib.*

Thank you for the thoughtful comments!
