

Ref.: Manuscript NO.: 53459 entitled "Thoracic Hydatid Disease: An Imaging Review of Unusual Cases", submitted to World Journal of Clinical Cases

Dear editor,

Please find attached a revised version of our manuscript "Thoracic Hydatid Disease: An Imaging Review of Unusual Cases ", which we would like to resubmit for publication as a mini-review in World Journal of Clinical Cases.

The reviewers comments were highly insightful and enabled us to improve the quality of our manuscript. Specifically, the reviewers suggested providing an overview of hydatid disease including pathogenesis, pathology, diagnostic tests and management. We added a new section "*Clinical Overview of Extrapulmonary and Intrathoracic Hydatid Cysts.*", which is highlighted in red in the revised manuscript. In this new section, we briefly reviewed the clinical presentation, diagnostic methods, and management. Pathogenesis and pathology of hydatid cyst were described in other sections including the *Introduction* and *Hydatid Cyst Structure and Pathogenesis*.

We hope that the revisions in the manuscript will be sufficient to make our manuscript suitable for publication in your journal.

We shall look forward to hearing from you at your earliest convenience.

Yours sincerely,

Subha Ghosh, MD
