

Dear Editors,

Thank you for your kind letter and for the reviewer's comments concerning our manuscript entitled " Bone remodeling of sigmoid sinus diverticulum after transverse sinus stenosis stenting for pulsatile tinnitus: A case report" (60105).

We have studied comments carefully and have made corrections, which we hope are met with approval. The main corrections in the paper and the responses to the reviewer's comments are described below. And we have added the required file in the revised version. Thanks again for your time and letter.

Yours sincerely,

Xiaoyu Qiu (First author),

Zhenchang Wang (Corresponding author).

Dear reviewer,

We would like to express our sincere appreciation for your careful reading and helpful comments. Those comments are all valuable and very helpful for revising and improving our paper, as well as the important guiding significance to our researches.

We have addressed the points noted below without lengthening the paper.

Responses to Reviewer #1:

This is an interesting case which reflects a common complaint for neurotology daily practice. The authors describe the case in a well designed fashion. In my opinion, the manuscript needs further support for language editing. There are many grammatical errors. However, the case is well presented with nice CT sections.

Reply: Thanks for your comment. The manuscript has been edited, and language has been corrected. And we believe that your suggestions will be a new subject for future work. Thank you!
