

Dear Editors and Reviewers:

Thank you for your letter and for the reviewers' comments concerning our manuscript entitled "Case Report of Haemangiomas in the Urinary Bladder: two rare cases and a literature review" (Manuscript NO.60514, Case Report). Those comments are all valuable and very helpful for revising and improving our paper, as well as the important guiding significance to our researches. We have studied comments carefully and tried our best to improve the manuscript in accordance with the opinions of the editors and reviewers and made some changes in the manuscript according to the guidelines and requirements for manuscript revision and the format for manuscript revision which we hope meet with approval. These changes will not influence the content and framework of the paper. Revised portion are marked in red in the paper. The main corrections in the paper and the responds to the Editors and Reviewers' comments are as flowing:

Responds to the reviewer's comments:

Reviewer #1:

Response to comment: English language needs further polishing. For example, "case 1. And case 2 finally underwent a Laparoscopic partial cystectomy" you cannot start a sentence with "And", laparoscopic does not need a capital letter, while in other points of the manuscript you forgot it. Tables and figures should stay at the end of the manuscript (you can find guidelines for writing on WJCC website), and in the section chief complaints Case 1 and Case 2 must be separated.

Response: We have studied comments carefully and have made correction according to the Reviewer's comments. We are very sorry for our negligence that laparoscopic does not need a capital letter and we have corrected which is marked in red in the paper. "And" in the sentence "case 1. And case 2 finally underwent a Laparoscopic partial cystectomy" was deleted. We have made correction and make sure that Tables and figures stay at the end of the manuscript and in the section chief complaints Case 1 and Case 2 separated according to the guidelines for writing on WJCC website.

Responds to the EDITORIAL OFFICE'S comments:

Response to comment: The similarity index was little high, please revise the manuscript according to the CrossCheck report.

Response: We have revised the manuscript according to the CrossCheck report to reduce the similarity index. Then, we invited Prashant Mishra who is a native-English speaker to edit the manuscript for grammar, sentence structure, word usage, spelling, capitalization, punctuation, format, and general readability.

Response to comment: Issues raised: (1) The authors did not provide the approved grant application form(s). Please upload the approved grant application form(s) or funding agency copy of any approval document(s); (2) The authors did not provide original pictures. Please provide the original figure documents. Please prepare and arrange the figures using PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed by the editor; (3) PMID and DOI numbers are missing in the reference list. Please provide the PubMed numbers and DOI citation numbers to the reference list and list all authors of the references. Please revise throughout.

Response: (1) we have uploaded the approved grant application form(s) ; (2) We have prepared the original figures and organized them into a single PowerPoint file ensure that all graphs or arrows or text portions can be reprocessed and submit as "**60514-Figures.ppt**" to the file destination of "Image File" . We also provided original table and organized them into a single Word file, and submit as "60514-Tables.docx" to the file destination of "Table File".

; (3) We are very sorry for our incorrect writing reference list. We revised throughout and added the PubMed numbers and DOI citation numbers to the reference list and list all authors of the references.

Other changes:

Line 4 on page 2, "**Core tip:** Urinary bladder hemangioma (UBH) is a benign non-urothelial tumor that rarely occurred in pediatric and adolescent patients . Clinical and radiological examinations are not adequate for an accurate diagnosis. We describe two rare cases of urinary bladder hemangioma (UBH), in which was confirmed histopathology followed by Immunohistochemistry (IHC) and review the literature on the diagnosis and treatment of patients with this disease. " was added.

We have uploaded **COPYRIGHT LICENSE AGREEMENT** and **CONFLICT-OF-INTEREST DISCLOSURE FORM** based on the requirements of the journal.

We appreciate for Editors and Reviewers' warm work earnestly, and hope that the correction will meet with approval.

Once again, thank you very much for your comments and suggestions.

Yours sincerely,

Guicheng Zhao
