**REVIEWER REPORT(S):**

**1. Specific comments to authors:**

This manuscript brings us a case report on the use of infliximab in a case of intestinal inflammation after transplantation. The authors were able to demonstrate the effectiveness of the treatment in the analyzed protocol and the patient, until now, is in remission of symptoms. This work is of great importance but studies expanding the number of participants are necessary to validate the hypothesis created.

Question: This work is of great importance but studies expanding the number of participants are necessary to validate the hypothesis created.

Answer: Thank you for the reviewer's proper comment. We have only one case using the same treatment, therefore, we reported this case as a case report in this time. This report will be submitted to World journal of Clinical Case as recommended by the office.

**2. Science editor:**

1 Scientific quality: The manuscript describes a case report of the maintenance treatment with infliximab for ulcerative ileitis after intestinal transplantation. The topic is within the scope of the WJG. (1) Classification: Grade C; (2) Summary of the Peer-Review Report: The authors report a case on the use of infliximab in a case of intestinal inflammation after transplantation.
