First of all, we would like to express our sincere gratitude to the reviewers for their constructive and positive comments.

#### **Replies to Reviewer # 1:**

**“But I have one problem, you found this kind of cutaneous metastasis, what method is used for targeted treatment?”**

**Answer:** This is an excellent question. While reviewing the case, we realized that comprehensive and evidence-based management would be the key to the long-term survival of the patient. However, thinking prospectively, there are some therapeutic agents available currently, such as targeted therapy and immunotherapy, that would be worth trying for this kind of patient to achieve better clinical outcomes with the permission of the patient.

#### **Replies to Science editor:**

**“Issues raised:**

**(1) The “Author Contributions” section is missing. Please provide the author contributions;**

**Answer:** We have modified the manuscript accordingly.

**(2) The authors did not provide original pictures. Please provide the original figure documents. Please prepare and arrange the figures using PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed by the editor;**

**Answer:** We have modified the manuscript accordingly.

**(3) The “Case Presentation” section was not written according to the Guidelines for Manuscript Preparation. Please re-write the “Case Presentation” section, and add the “FINAL DIAGNOSIS”, “TREATMENT”, and “OUTCOME AND FOLLOW-UP” sections to the main text, according to the Guidelines and Requirements for Manuscript Revision.**

**Answer:** We have modified the manuscript accordingly.
