Dear editor,

Please find attached files of revised manuscript in word format

Title: The impact of different stereoisomers of inositol on insulin sensitivity of GDM patients

Author: Jing He, Yanli Zhang, Liping Wang, Xiaochun Liu

Name of Journal: World Journal of Clinical Cases

Manuscript NO: 60358

First of all, thank you for your careful guidance of this article. Revision has been made according to the suggestions of the reviewer:

Reviewer: 02856362

The purpose of this study is to explore new treatment methods that can reduce insulin resistance in patients with gestational diabetes mellitus. This study is interesting. The reviewer has some minor comments: 1. The manuscript requires a carefully editing. Please check the abbreviations in the text, and some Chinese punctuations should be changed. 2. The IRB statement should be included in the manuscript. 3. The two figures are redundant, I suggest to remove them.

Reviewer: 02857752

In this study, the authors discussed the impact of different stereoisomers of inositol on insulin sensitivity of gestational diabetes mellitus patients. The design of this study is very well, and the results are interesting. Comments: 1. A minor language editing is required. Some minor language polishing should be corrected. 2. Manuscript should be edited according to the journal's guidelines. Results are discussed with updated references. However, a conclusion is needed. 3. Data in tables are very good. Please edit the tables carefully. 4. The data in the two figures are same with which in the table 4. Please delete the figures.

Thank you for your advice.

After receiving the comments, we read the article carefully and found some small loopholes in the language of the article and made modifications. Corrected errors in Chinese punctuation and abbreviations. I added a conclusion section and IRB statement to the manuscript. Edited the chart. Delete the figures.

According to the suggestion, we changed the relevant description.

Thank you again for publishing our manuscript in the World Journal of Clinical Cases.

Sincerely Yours,

Xiaochun Liu
