

ANSWERING REVIEWERS

20th of January 2014,

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 7508-review.doc).

Title: Ulcerative colitis worsened after *Clostridium difficile* infection: efficacy of infliximab

Author: Andrada Seicean, Anca Moldovan-Pop, Radu Seicean

Name of Journal: *World Journal of Gastroenterology*

ESPS Manuscript NO: 7508

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

The cause of ascites and explanation for the lack of intestinal distention are added in Discussion section. "Hypoalbuminemia may also correlate with severe diarrhea as a result of proteinlosing enteropathy and negative acute phase protein[16]. This may explain the ascites in our case. However, the ascites associated with the distention of tranverse colon can suggest toxic megacolon and bowel perforation, which was not the case of this particular patient."

3 Gramatical errors are corrected

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

A handwritten signature in black ink, appearing to be the initials 'AS'.
