Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 8025-edited.doc).

Title: Neuroendocrine carcinoma of gallbladder Report of 2 cases

Author: Hao Chen, Yan-Ying Shen , Xing-Zhi Ni

Name of Journal: *World Journal of Gastroenterology*

ESPS Manuscript NO: 8025

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

(1) According to the suggestions of the peer reviewer(review number :00068798), I have corrected words in the article (figure 1a)and illustration(figure 1b) with more precise descriptions. And I have added more details of the contrast-enhanced CT results for both two cases. You can check it in the revised manuscript.

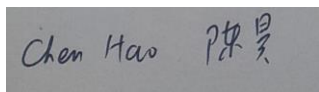

(2) According to the suggestions of the peer reviewer(review number :00503600), we provided some pathological examination results and the positive immunohistochemical staining results for chromogranin A (CGA) and synaptophysin (SYN), which are most widely tested in clinic. But the clinic value of immunohistochemical staining for pancreatic polypeptide and somatostatin still require further research. That is the reason we do not test them normally in our department of pathology.

3 References and typesetting were corrected

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

Hao, Chen
