**Reviewer #1:** This is a comprehensive review on the association of biomarkers in gastric cancer. This review is beneficial for understanding the etiology and clinical management for gastric malignancy.

**Author Response 1:** Thanks

**Reviewer #2:** The authors have thoroughly reviewed not only prognostic and therapeutic, but also diagnostic tumor markers for gastric cancer. The title of the manuscript needs to be revised. However, there are many typographical error, and sentences which does not seem comprehensible. Extensive English correction is strongly required.
