

## ANSWERING REVIEWERS

May 18, 2014

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 10305-review.doc).

**Title:** Mitochondrial DNA alterations in the progression of gastric carcinomas: unexplored issues and future research needs.

**Author:** Rigoli L, Caruso RA

**Name of Journal:** *World Journal of Gastroenterology*

**ESPS Manuscript NO:** 10305

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

(1) We add a phrase (with the bibliographic reference) that indicates a recent review regarding experimental studies on H pylori, mtDNA and gastric epithelial cells. Modifications are **marked** in the text .

(2) At page 3 we add further clinicopathologic data about gastric cancer of intestinal and diffuse type. Modifications **are marked** in the text.

(3) We improved "Introduction" to focus the topic of review. The section "Adenocarcinoma classification .." is modified to include previous paragraphs. At page 5 in the section "Classification of gastritis" we include the "Updated Sydney System" and the OLGA/OLGIM classifications. We convert the 2 tables into a single table to reduce redundant data. A better correlation with the text is also carried out. However, the whole manuscript has been simplified and abbreviated for the average reader of WJG. **All corrections are so marked**

3 References and type setting were corrected

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

Luciana Rigoli
