

December 2, 2014

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 14829-review.doc).

**Title:** Collagenous nodule mixed simple cyst and hemangioma coexistence in the liver

**Author:** Zhen-Jiang Zheng, Shu Zhang, Yang Cao, Guang-Chun Pu, Hong Liu

**Name of Journal:** *World Journal of Gastroenterology*

**ESPS Manuscript NO:** 14829

The manuscript has been improved according to the suggestions of reviewers:

1. Format has been updated

2. Revision has been made according to the suggestions of the reviewer

(1) The patient is come from countryside. The medical insurance of this patient was not belong to Chengdu. Most of the medical expense was paid by the individual. In order to reduce the economic burden, MRI (about 2000 RMB) was not performed.

(2) We change the following sentences in the discussion: 1. “The indications for surgery of hepatic hemangiomas are severe symptoms , uncertain diagnosis, and complications.” to “ The indications for surgery for liver hemngiomas are Kasabach-Merritt syndrome, symptoms of organ compression that have been well established excluding other diseases, and traumatic or spontaneous rupture[11].” 2.We removed the sentence: “ Some authors have suggested that all giant liver hemangiomas and superficial subcapsular lesions, which could be prone to a traumatic rupture, should be resected[12]”

(3) We change the reference according to the modification of the part of discussion.

(4) The grammatical errors and incorrect English sentences were revised by English language editing company. We get the “Certificate of Service”. The title was changed to “Collagenous nodule mixed simple cyst and hemangioma coexistence in the liver”

3. References and typesetting were corrected

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,
