- (1) Suggestion 1: This review needs to be strengthened with the association between estrogen/soy and colorectal cancer risk in the sections of biological and dietary differences between genders.
Answer: As suggested, we have added two paragraphs incorporating these points in the revised sections to address the effects of estrogen and soy on colorectal cancer risk (pages 8-9 and page 13). Also, additional abbreviations in the new paragraph have been added (page 3).

- (2) Suggestion 2: Minor language polishing is suggested.

Answer: Our manuscript has been edited by an editing company prior to submission and the editorial certificate has been submitted. We have also double-checked punctuation and grammar after revision.

4. Another research fund has been added to 'Acknowledgements' (page 16).
