Name of Journal: *World Journal of Gastroenterology*

ESPS Manuscript NO: 16947

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

(1) Reviewed by 00816536: Interesting article. We still have multiple questions about: duration of treatment/ percentage of relapse when you stop treatment? it is so soon to be a recommendation. It is an individual experience. Need multicentric studies.

(2) Reviewed by 03252752: Nice article, good work effort. Need more details about the treatment duration, long term outcome and prognosis.

We also continue to follow-up this patient.

3 References and typesetting were corrected

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.
